

NEVER MISS AN OPPORTUNITY  
TO BE IN THE ROOM AND  
SUPPORT OPTIMAL OUTCOMES

The Explorer Live digital case support platform remotely connects medical device teams with providers to help accelerate product adoption and reinforce best practices during live procedures.

## 4x ROI

Saving an interventional pulmonology medical device company 100s of thousands of dollars<sup>1</sup>

## Force-Multiply Case Coverage And Innovation Opportunities

- Unlimited, real-time remote case observation and support between device teams and providers
- Customizable intraprocedural data capture and performance tracking
- Step-by-step digital playbook reinforces best practices for procedural consistency

1. Estimated potential annual savings and ROI based on an analysis conducted by Explorer Surgical.

# JUST IMAGINE THE POSSIBILITIES

**\$12,000**

Travel cost savings for one example remote case observation of a live procedure<sup>2</sup>

**<1 week**

TAVR training time using remote case observation, down from an estimated 3-4 months<sup>2</sup>

**2021**

Acquired by GHX to help providers and medical device companies deliver value-based care

## Key benefits:

- Peer-to-peer medical education and sales training
- Connect marketing and product managers with providers
- Empower R&D to innovate and collaborate

## PUTTING BEST PRACTICES IN THE HANDS OF ALL PROCEDURAL TEAMS

Today, operating room access can be limited and expensive to coordinate. On top of that, steep learning curves can lead to inconsistent outcomes and slow product adoption.

Our platform enables medical device teams (including medical science liaisons) to remotely connect with physicians through unlimited live case observation, proctoring and support via easy-to-use mobile devices.

Unmatched portability and convenience means no more oversized carts or tripping over wires

Ground care decisions in best practices and curtail waste while supporting provider preferences

Security and privacy designed to meet the requirements of HIPAA and other data privacy laws

Unlimited scalable access, offering much more than a standard two-way conferencing solution

## Drive Adoption and Support Excellent Outcomes with Explorer
