GHX Vendormate

Streamline Compliance with a Vendormate and RepScrubs Integration

Our integration with RepScrubs® empowers health systems to maintain streamlined, compliant access by combining GHX's credentialing data with RepScrubs' real-time analytics and scrub dispensing technology. Only credentialed and authorized personnel should be able to access scrubs through our approach, promoting secure environments and enhancing patient safety.

Incorporate accurate credentialing statuses based on your compliance program requirements

Boost visibility with automated notifications that let hospital administrators know who is on-site and when and where scrubs are dispensed

Gain greater peace of mind with a more robust process to help ensure that each rep is registered, compliant, and badged for the right location and department

Customize access management to match your team's location-specific compliance standards in Vendormate

Increase badging and strengthen compliance across your vendor credentialing program

Tap into dedicated support to help ensure the smooth operation of your program for vendor reps and facility staff

About **RepScrubs**

Founded in 2013, RepScrubs is revolutionizing healthcare compliance with a closed-loop system that ensures full transparency, accountability, and streamlined management of perioperative vendors across the nation. Trusted by over 600 leading U.S. hospitals, health systems, and surgery centers. RepScrubs' innovative platform simplifies vendor credentialing requirements, enhancing security and compliance in high-stakes healthcare environments.

If RepScrubs dispensing machines are not at your facility, we can help you get started!

How it Works

Vendormate health systems will be required to have a corporate partnership with RepScrubs to facilitate this integration.

1 **Customize and Configure.** Configuration is simple and fully customizable to match your facility's needs. Our team will support you throughout the rollout, minimizing disruption for visiting reps in procedural care areas.

2 **Credential Verification on Every Visit.** Each time a vendor representative visits, their compliance status and badge is verified based on your Vendormate credentialing policies before scrubs are dispensed from the RepScrubs ScrubPort ®.

3 **Gain Real-Time Insights.** Combined with Vendormate data, this integration gives you full visibility into each representative's activities, including badging history, compliance status, any missing credentials, ScrubPort dispense history, and locations accessed.

Frequently Asked Questions

What happens if a compliant Vendormate badge is not generated for the vendor representative?
Scrubs will not be dispensed. Rules can be set to determine grace periods or escalation, but when the time is right for your program, we recommend a "no badge, no scrubs" policy for accessing your hospital's sensitive and secure procedural areas.

What happens if a vendor is not registered with Vendormate?
The vendor must have an active registration with Vendormate and RepScrubs for scrubs to be dispensed*. Your facility's registration and badge rules should govern the access of vendors.

Is there a cost for this integration?
No, there is no additional cost to either you or vendor representatives for this integration. There are required subscription fees that will apply for both Vendormate and RepScrubs customers.

How do I prepare vendor reps for this integration?
GHX and RepScrubs will alert impacted vendor representatives of the required steps, but content can also be shared with your health system as needed.

*Vendor representatives will be required to link their active Vendormate and RepScrubs accounts.
